SEEMRAY

Global 70™

The Global70™ series, our standard tilt and turn windows, are the perfect option for any home. Able to be both tilted open at the top and swung open from the side, these windows give you the perfect balance.

Our beautifully designed, premium German quality tilt and turn windows will make your home filled with light and joy. Let us get you a free, no obligation estimate today, for your dream windows.

 **U-Value: Down to .18**

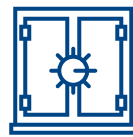

Quick Comparison Facts

1.5x efficiency

Our Global70™ windows are 50% more energy efficient than what is required by ENERGY STAR® certification standards.

3x stronger

A steel reinforced frame strengthens the entire window, keeping the structure intact without bending. Guaranteed for 100 years.

1.8x soundproof

Global70™ windows are 80% more soundproof than that of most architectural-grade windows, keeping out the sounds of lawnmowers, cars, etc.

3x secure

With a 10-point locking system and optional Super Triplex laminated or tempered glass, these windows are 3x more secure than the average window.

Design and Technology

- ① 1/6" thickness glass.
- ② 5 chamber sash for increased thermal performance.
- ③ 5 chamber outframe for enhanced thermal performance without compromising on structural capability.

i Performance Summary

Structural:	up to	CW-PG75
Impact:	up to	DP80
Acoustical:	up to	42 dB
Thermal:	down to	0.19
SGHC:	down to	0.15

The Global70™ difference

- ✔ 2 3/4" thick Rehau uPVC Frame which will never chip, crack, warp, or peel.
- ✔ Minimum 1/6" thick glass for utmost energy efficiency and reliability.
- ✔ A limited lifetime warranty which covers every Seemray window from top to bottom.
- ✔ Double weather stripping throughout, with polymer compression seals to eliminate air and water infiltration.
- ✔ 10-point locking system around the entire perimeter for perfect soundproofing and optimum security and airtightness, for common sized window.
- ✔ Isolated warm edge spacer technology in every Global70™ and Global86™ window.
- ✔ Low-e coated glass protects from dangerous UV lights and saves your energy bill.
- ✔ Metallic frame profile strengthens entire window.

Available Enhancements

Impact-Rated

An optional upgrade is a Hurricane-Proof Triplex glass, 2mm thick glass panes glued together, working as a car wind-shield. It offers extra impact resistance and security. Damaged glass won't shatter, instead will crack, which keeps home temporarily secured until window replaced.

Triple Glass

Upgrade the insulated 32mm glass to triple pane and/or extra thick 1/4" glass panes to bring the u-value down to .16.

40% UV Coating

Another addition can be special glass powder coating, which offers additional UV protection and reflection of up to 40%, and replace the need of a protective glass screen. This offers additional savings on AC energy during summer months.

Tilt-and-Slide Doors

Our tilt and slide doors are the perfect addition to connect your home to the outside. These doors are able to tilt open at the top or slide open like a sliding door. Let us get you a free, no-obligation estimate today for your dream patio doors.

More Info

The Seemray tilt-and-slide system is a premium door solution for spaces that do not allow for traditional inswing doors. The unique sash design tilts and slides parallel to the fixed unit with the touch of a finger. Optimal profile design and compression-seal technology contribute to outstanding performance. Available in white, beige or clay colors, the system can also be laminated with solid color or wood-grain foils. Matching windows in a variety of configurations are also available.

1. Unique design

Operates in top venting and sliding positions.

2. Multiple locking points

Create a tight seal against sound, air and water infiltration.

3. Ergonomically shaped aluminum turn handle

Controls every function.

4. High-quality European hardware

Operates easily and quietly.

5. Built-in security in tilt position

When in the tilt position, the sash automatically engages the locking mechanism providing security against being pulled open.

6. 1 3/8" (35 mm) glazing channel

Accommodates triple glazing, increasing energy efficiency and acoustical properties.

7. 2 3/4" (70 mm) and 3 2/3" (93 mm) frame depth

Provide flexibility for new construction and replacement projects.

8. Structural T-mullion profile

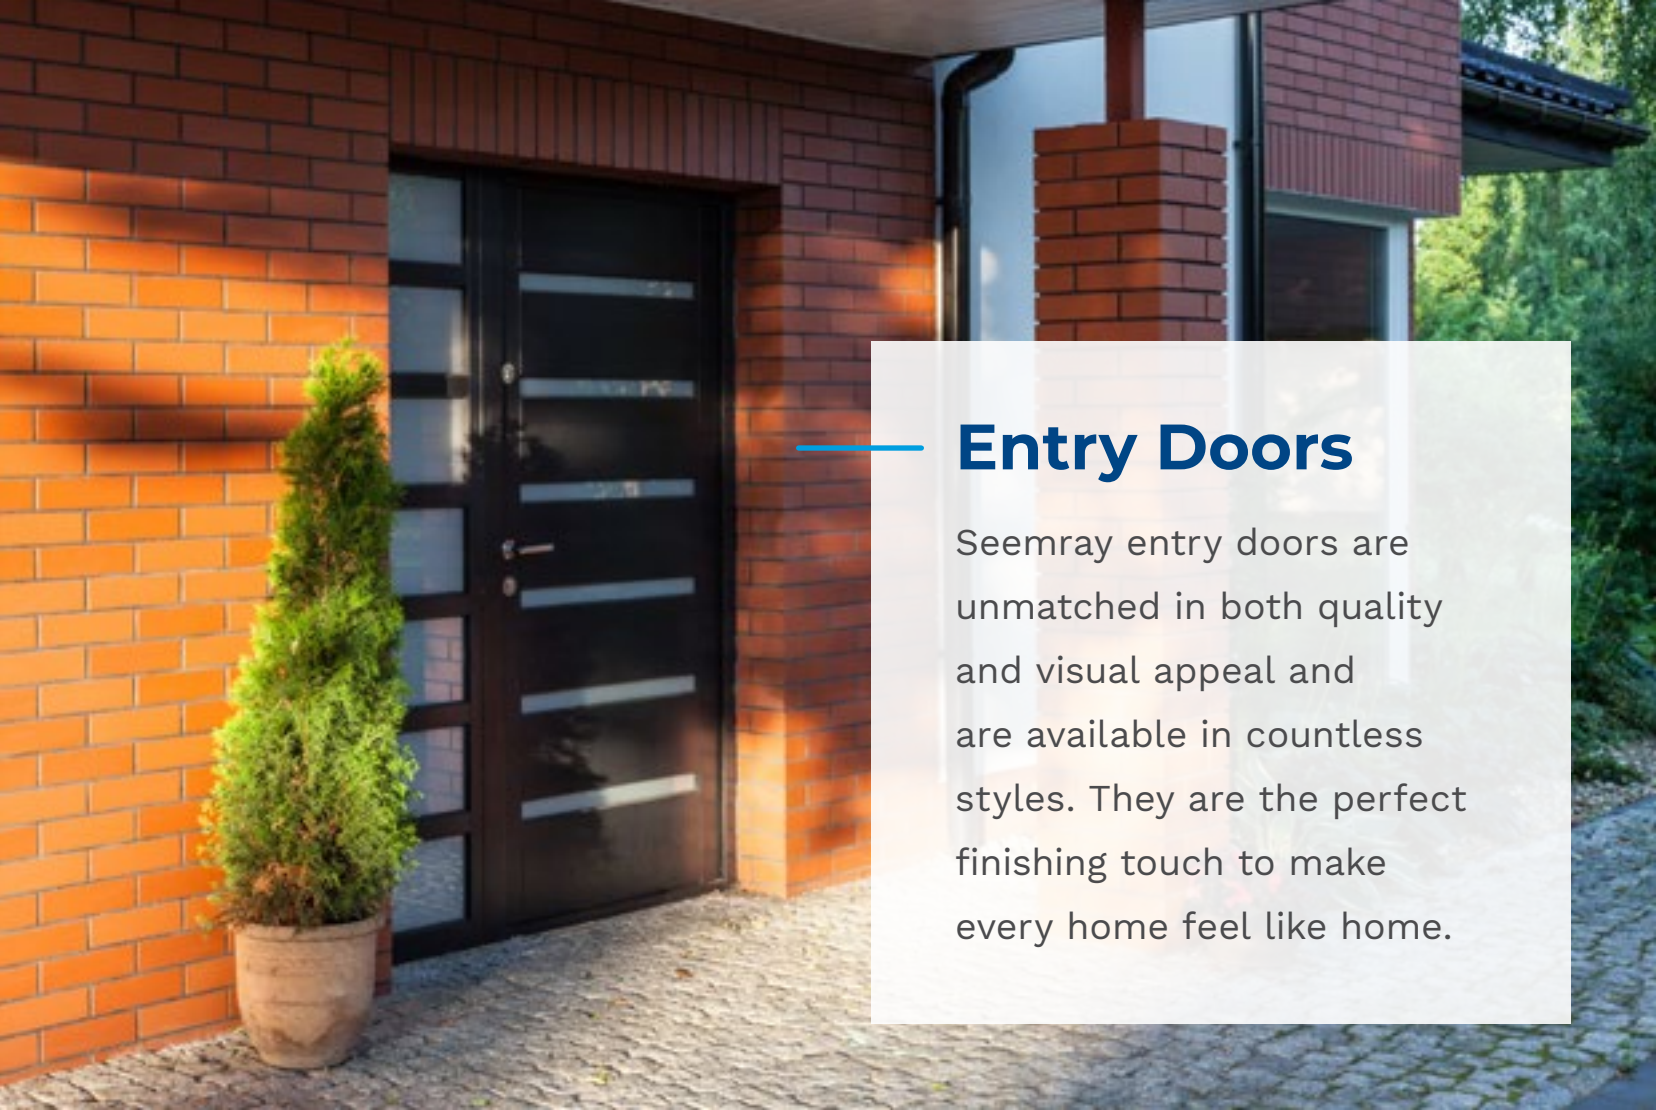

Allows door to be configured as multiple panels.

i Performance Summary

Structural:	up to	CW-PG75
Impact:	up to	DP65
Acoustical:	up to	41 dB
Thermal:	down to	0.18*
SGHC:	down to	0.15

* — based on simulation

Whether you need a way to provide extra airflow into your home or just want a smooth sliding door to use time and time again, our tilt-and-slide doors provide you with the best of both.

Entry Doors

Seemray entry doors are unmatched in both quality and visual appeal and are available in countless styles. They are the perfect finishing touch to make every home feel like home.

Our Doors

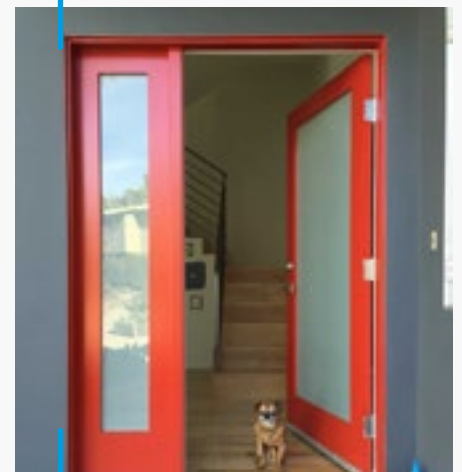

Our vinyl entry doors are available in two major styles, which are able to be customized to best fit your home and personality.

G-Model

As solid as they come, our G-Model vinyl entry doors are strong, sturdy, beautiful, and available in a wide range of colors and designs.

Impact

Featuring large panes of glass, our Impact vinyl entry doors are able to add a statement to any home as well as present top-of-the-line security.

Lift-and-Slide Doors

Our lift and slide doors are some of the smoothest and most visually appealing sliding doors on the market. They are guaranteed to lighten up your home and operate just as easily. Let us get you a free, no-obligation estimate today for your dream patio doors.
